EAST RICHMOND.

The Bostock benefit recently given the Masonic Home, was a grand success. There was an immense crowd, and the box office receipts on that day were larger than on any previous benefit day. They received half of the proceeds of all tickets sold outside of the box office, and all over \$2.50 taken in at the box office which was \$30.00. The entire amount turned over to the institution is not known, but a splendid sum it was—and a most agreeable surprise as well.

A child will grow up with weak and small bones or strong and sturdy frame, depending on the kind of food given. That's why feeding the youngstors is of such great importance. The children do not select the food—the responsibility rests with the parent or guardian, or with you if you select the food for a boy or girl.

MR. ABBOTT'S VIEWS.

Mr. Abbott's emarks are along the same line, although, possibly a little more alphonate. He same

same line, although, possibly a little more claborate. He says:

"Let' us have good streets,' should be the slogan and golden rule of every municipal government. Certainly, it is true that a city is judged more by its streets than any other one thing; and Manchesterians are coming to realize this fact. Within the past few years the question of permanent street improvements has sorely puzzled the city fathers, and it can be truthfully said that this question has sorely puzzled the city fathers, and it can be truthfully said that this question has sorely puzzled the city fathers, and it can be truthfully said that this question has sorely puzzled the city fathers, and it can be truthfully said that this question has sorely puzzled the city fathers, and it can be truthfully said that this question has sorely puzzled the city fathers, and it can be truthfully said that the following important topics of municipal economy. Many citizens would like to have a new city jail, a multitude desire clear water, but there is a unanimity of opinion in regard to the permanent improvement of the streets that admits of no doubt nor delay—they demand it.

There is no difference of opinion as to what should be gone, but the wherewithal to do it is the rub.

Many plans, including asphalt roadways, gravel roadways, etc., have been discussed and rejected and the consensus of opinion among the citizens would seem to indicate that the following plan is the popular one: It is proposed to pawe every prominent sidewalk and roadway to be payed with vitrified brick, and the sidewalks, from the curbing half the distance to the fence line with ordinary brick. The distance from the fence line to the brick pavement is to be turfed.

THE COWS MUST GO.

If this plan carry, it will mean that cows will have to go, and there will doubtless be some opposition on the part of the cow-owners. But those latter could very easily club together and engage the services of a boy at a nominal wage, to drive the cows out of mornings to pasture and to bring them liaborate. He says:

THE BLOOD The MAINSPRING 9 HEALTH

The most wonderful part of our being is the blood. It is the fountain of life, the vital life-sustaining fluid, containing everything needful for the growth and development of the body, and as it circulates through the system carries material for the making of bone and muscle and nourishment for the nerves and tissues. Every atom of the body is dependent upon the blood for its existence. The

I had about as severe a case of Eczema as falls to the lot or suffering mortals, but am exceedingly glad to inform you that I am now as sound as a dollar, not a vestige or sign of the disease remains. Four bottles of S. S. S. drove it out of my system and I believe effected a permanent cure. I shall continue to take S. S. S. for some time in decreased doses because I consider it a great blood purifier, tonic and appetizer. Yours truly, N. A. RANDALL.

Unfitted for Work.

Unfitted for Work.

Gentlemen: For over two years I suffered greatly from impure blood, causing me to feel debilitated and unfit for work, had no appetite and could get no relief from doctors or medicines of any kind, until finally I was persuaded to try S. S. S. I soon noticed a change in my health for the better, I continued its use, and at the end of three months was completely well, and my appetite has been good ever since, and I now weigh 250 pounds.

I consider S. S. S. the best blood medicine to be found anywhere. Yours truly,

bones would decay, muscles shrink and the skin become parched and shriveled but for the nutriment they draw from the blood, and so long as it remains uncontaminated and pure we are fortified against disease and health is assured. But the blood is constantly exposed to poisonous elements from a thousand sources; we come in contact with infectious diseases almost every day; we breathe into our lungs the germs of Malaria; the water we drink is teeming with millions of microbes, the dust of the streets is filled with bacteria, and when these gain access to the blood are distributed to all parts of the system and the blood becomes a carrier of disease instead of health. Deadly poisons are generated within the body itself, which pollute and vitiate the blood, from which serious and often fatal maladies result.

There is scarcely a disease that cannot be traced to a bad condition of the blood. Rheumatism, Scrofula, Catarrh, Eczema, Tetter, Acne, Contagious Blood Poison and many other equally as distressing ailments are due to a dep aved condition of the blood, for which there is no ure except through the purification of the entire blood system. Sores and skin eruptions of the most frightful character, ugly splotches upon the skin, blackheads,

pimples and the red disfiguring bumps so often seen upon the face and neck are also evidences of diseased blood. The use of cosmetics, face bleaches, soaps and lotions hide the blemishes and conceal for a time the roughness and redness of the skin, but do not reach the cause, which is hidden deep down in the blood and beyond the reach of external treatment.

The blood is the main spring of health, the life current that strengthens and refreshes the body, and upon its purity depends your health and happiness. If disease has already entered and you are suffering from some malady for which an impure blood is responsible. a blood purifier and tonic is what you need, and none is so good as S. S. S., which for nearly fifty years has been recognized as the standard remedy in all blood and skin diseases. It is

guaranteed purely vegetable and can be taken by old

and young without fear of any harmful after-effects. S. S. S. is a perfect blood medicine; it destroys and eradicates germs and poisons of every description and restores to the weak and innutritious blood its lost properties, makes it rich and strong again, and under the vitalizing effects of good blood the system rallies,

and the patient enjoys again the blessings of perfect health. If you have Rheumatism, Scrofula, a Sore or Ulcer, Catarrh, Eczema, Tetter, Acne. ble way in which the money to financier this deal can be raised—a special tax. The city has reached the limit of its bond issue allowed by the charter. If there be three thousand taxable citizens in Manchester and each one be assessed an additional tax of five dollars, the money thus raised will solve the problem. Tais tax of course, would be assessed for only ten years; and any citizen who has the interest of his city at heart will gladly pay that.

At the expiration of ten years, it would be no Utoplan dream to say, that Manchester would be one of the most beautiful cities in the world. And more manufacturers would be attracted, for residences would be erected, and truly Manchester would be a likely city.
